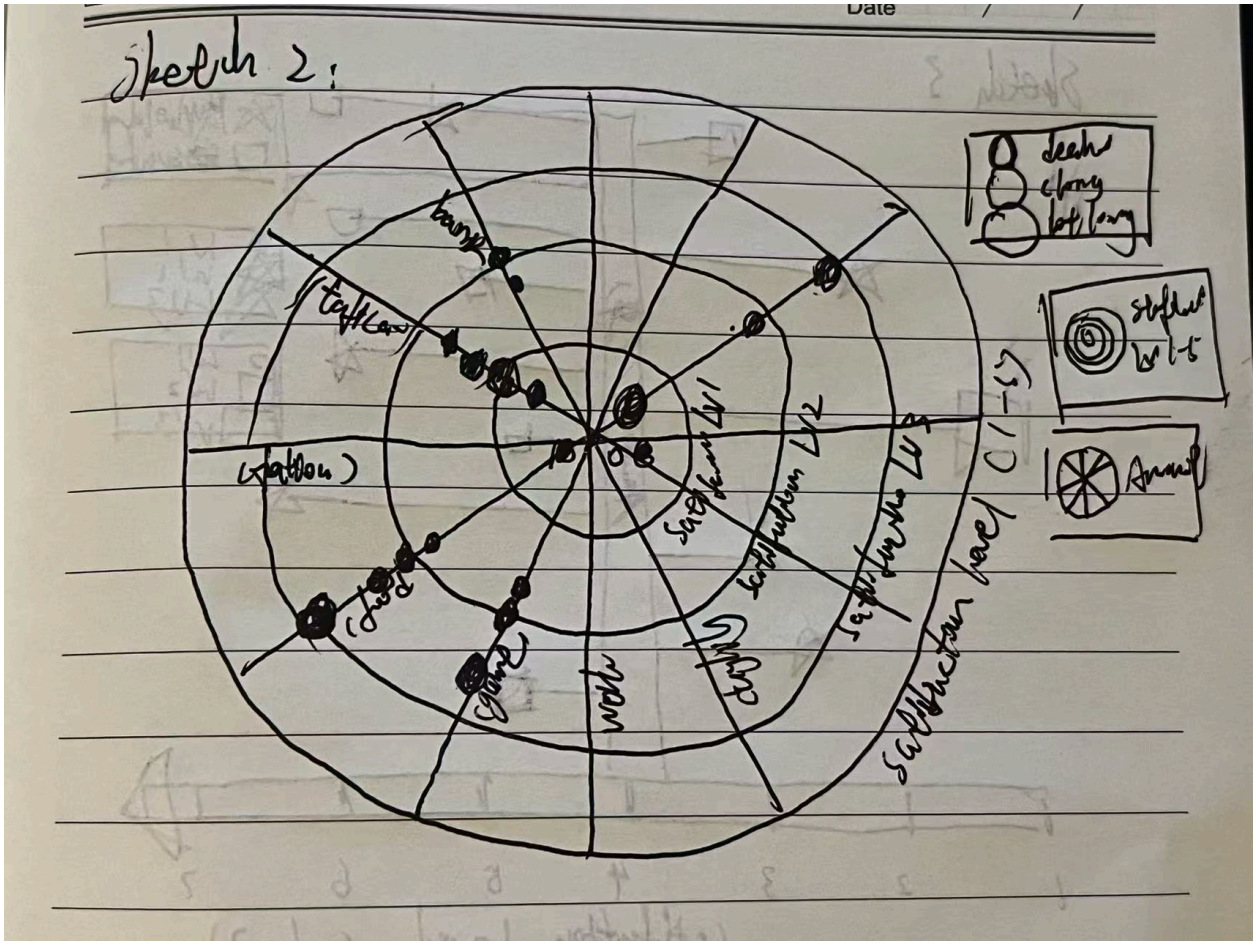
21	29.14	4	Spark	1	
22	30.63	3	Survival/Spark	2	
23	9.68	3	Survival/Spark	1	
24	45.28	5	Survival	3	
25	6.00	4	Spark	1	

26	11.62	3	Survival/Spark	2	
27	9.96	3	Survival/Spark	2	
28	25.91	3	Survival/Spark	2	
29	22.99	3	Survival	2	Granville Kebab
30	11.08	3	Survival	2	Nesters Market
31	10.00	2	Survival	2	PTS transfer
32	22.89	4	Survival	2	Kinkura Sushi
33	39.36	3	Survival	1	Susu Hair Bar
34	2.72	2	Survival/Spark	1	Macs Convenience
35	40.00	3	Survival/Spark	2	Compass Vending
36	43.66	4	Spark	1	Steam Games
37	21.00	3	Survival/Spark	1	Enerpro (energy drink)
38	33.59	4	Spark	1	Riot Games
39	63.00	4	Survival	2	Shabusen Yakini
40	60.00	3	Survival/Spark	2	Compass Vending
41	4.35	2	Survival/Spark	1	Macs Convenience Mar12
42	23.80	3	Survival	1	Jollibee
43	20.52	3	Survival/Spark	1	Enerpro Mar9
44	4.35	2	Survival/Spark	1	Macs Convenience Mar5
45	62.80	3	Survival	3	Shaw Cable (bill)
46	24.38	3	Survival/Spark	1	Uber Mar17
47	34.94	3	Survival/Spark	1	Uber Mar16
48	40.43	3	Survival	2	Instacart Mar13
49	78.71	4	Survival	2	Instacart Mar11
50	25.52	3	Survival/Spark	1	Uber Mar6
51	26.97	3	Survival/Spark	1	Uber Mar3
52	8.99	2	Survival/Spark	1	Uber Mar2
53	53.85	4	Survival	2	Instacart Mar2
54	25.68	3	Survival/Spark	1	Uber Feb27

Other sketch:



I think this radar chart might be more interesting than my tree diagram, but it will be much more difficult.

Analysis of chart

I chose a tree structure because spending feels organic — some purchases are necessities rooted in survival, others are sparks of joy. The alternating left-right branches prevent overlap and make each purchase easy to trace. By encoding amount as branch length, category as shape, and satisfaction as trunk color, the tree lets you see at a glance that larger planned purchases (Plan/Survival) tend to cluster toward the top with higher satisfaction, while smaller impulse buys (Instant/Spark) spread outward unpredictably.

Summary

As I mentioned in class, my data did indeed refute my hypothesis. What I found interesting was that my data neither completely refuted nor perfectly proved it. I think I need to be more rigorous in my data recording methods and evaluation criteria in the future. For example, data like mood scores always have significant margins of error. However, I'm still very satisfied with my data presentation. I find data visualization very interesting. I also derived a lot of enjoyment from writing code.
